

ComSouth Internet Services

ComSouth is your locally owned provider of Internet access services as well as a full complement of world-class telecom products. ComSouth has invested significant resources to ensure both the reliability of our overall system and the expandability of critical components within the system.

No matter what challenges lie ahead – from severe weather to major technological changes to population growth – we at ComSouth are prepared to deliver the service you need every day.

Enjoy the Internet at high speed! ComSouth offers fast Internet connections that usually exceed speeds delivered by other providers.

With ComSouth's High Speed Internet Service You Get:

High Speed Access

ComSouth's high speed Internet access is delivered via the latest technology. For your area, this may be Cable Modem, DSL or FTTP (Fiber-To-The-Premise)

Dynamic IP Address

You get a dynamic IP address temporarily assigned from a pool of IP addresses from a centrally administered server.

E-Mail Addresses

You can get a @comsouth.net e-mail address with your residential account. Additional e-mail addresses may be added and may require an additional fee.

Worldwide E-Mail

ComSouth is proud to offer Internet-based e-mail enabling you to check your e-mail using any web browser from anywhere in the world! When traveling, all you need is Internet access, then go to www.comsouth.net and click on E-mail. Enter your ComSouth username and password.

ComSouth

- ComSouth Fiber Service available at your address

Question & Answer

What about my e-mail address?

You can have a @comsouth.net e-mail address. Additional e-mail addresses may be added and may require an additional fee. The e-mail address on your Internet service will be johndoe@comsouth.ent (if that choice is not already in use). Programs such as Outlook Express and Outlook will allow you to send and receive your e-mail. Your mailbox size is 20MB, which allows you to send and receive up to 20MB of files. You can utilize web mail to access your e-mail at home or anywhere in the world.

What is a Static IP?

This is an internet Protocol address that remains the same everytime a user logs onto the internet. Because it is "fixed" address, it is easier for the other Internet users to locate and connect to the hosting computer. Static IP addresses available for \$15 per month.
